

Mount Kenya Luxury Specification

LUXURY SPECIFICATION: This luxury edition will make sure you are as comfortable as you can get on a mountain without losing the beauty and serenity of being in nature. You will enjoy a larger mess tent than the standard specification with backed chairs instead of stools, as well as a larger client tent with a 3" foam mattress to make your night more comfortable. There is an extra portable toilet for use at the campsites as well as a portable altitude chamber in case needed. Evening meals have an additional course (entrée) and there is fresh pressed coffee available. All in all, a perfect blend of raw adventure and creature comforts.

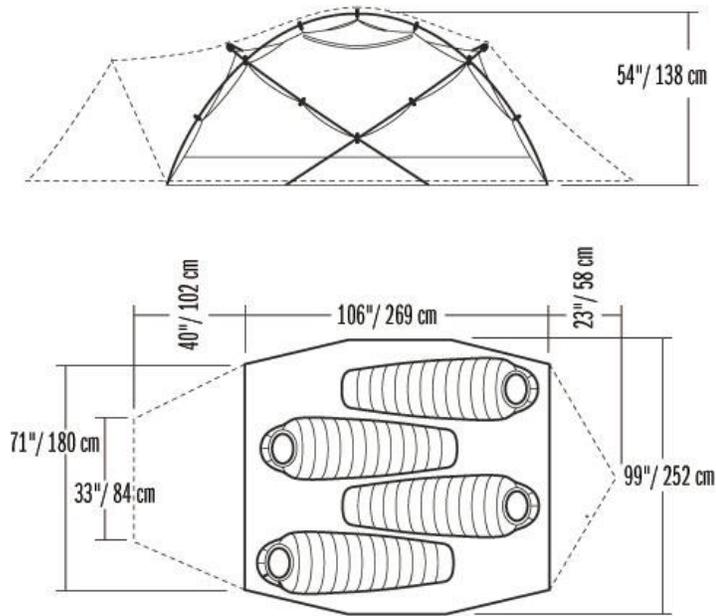

CREW NUMBERS:

Sometimes people are a little shocked at the numbers of crew involved in these expeditions but bear in mind that you are trekking for multiple days where complete camps have to be carried throughout the trek. One should also bear in mind the amount of fresh food that needs to be carried on the mountain and the logistics when carrying out a resupply in an austere environment and on challenging terrain. However, the employment benefits from these trips are significant and with our teams you'll love the camaraderie too. The numbers of porters vary with specification. Generally, we tend to have higher numbers of crew than 'budget' operators. Why? Because we do not overload our porters and we carry essential extras such as stretchers, oxygen, first aid kits, mess tents for all specifications, fresh food and so on.
